Dated this day 22nd July, 2021.

Australia is no stranger to national disasters, from cyclones & floods in the north, devastating bushfires in the south and drought everywhere. We also have our fair share of man made disasters, such as the Granville train derailment.

We deal with these national disasters in our communities through support, solidarity, & a sense of mateship that is all our own. Now we have a new, man made, national disaster. The Covid-19 vaccine.

At the date of printing there have been nearly 400 deaths, & more than 40,000 injuries since the jab was rolled out earlier this year. To put this in perspective, in the ten year duration of our involvement in The Vietnam War, 551 Aussies were killed. We are nearly at that point in less than six months of the Covid inoculations.

This national disaster is different. This time, there is no support, no solidarity, no sense of mateship. The casualties are seldom reported in the media, and are dismissed as 'coincidences'

399 coincidences of death, and 41,406 coincidental injuries.

What has happened to us?

Are we that scared and living in fear by the constant media propaganda and government interference in our lives that we have forgotten that we are FREE people? The Australia that we know and love is quickly being destroyed. If we do not stand up now and say NO, it will be lost forever. She'll be right mate doesn't cut it anymore.
