

Urgent Communication:

The Spike Protein is the reason why the vaccines may kill you

It normally takes over 10 years to make a new vaccine - This vaccine has been rushed.

No matter what you have been told there's no way they could have done all the tests they normally do in 10+ years in just a few months, including waiting 9 months to see if children born to vaccinated parents are healthy.

The COVID 19 Virus is covered in Spikes - called "The Spike Protein". The new mRNA Vaccines get your body to produce millions of these "Spikes". There is no OFF button, once you are injected, there's no telling when the body will stop making the Spikes.

The latest studies show that up to **75% of the vaccine leaves the injection site** and travel in the blood all over the body. Potentially ending up in your ovaries, heart, brain and even bone marrow, which could lead to Blood Cancer (leukaemia).

These "spikes" are like having millions of tiny daggers inside your body. Many people have died from blood clots caused by the vaccines.

Blood clots we hear about through the media are the big clots only. They cause stroke, heart attacks etc and show up on CT Scans/ CT angiograms/ MRI's.

According to **Dr. Charles Hoffe** (See video: tinyurl.com/8k7e9fpt), the **microscopic clots occurring are too small/ scattered throughout the capillary network to show on any scan. They only show up on a "D-dimer" blood test that shows recent blood clots.** Dr. Hoffe located people who had their covid shot within the previous 4-7 days and **62% had evidence of clotting (majority).**

Heart/ brain/ spinal chord/ lungs damaged by clots can not regenerate ie when these tissues are damaged by blocked vessels, **damage is permanent.** All the younger people developing myocarditis (heart inflammation) have permanent damage.

Vaccinated people in Dr. Hoffe's medical practice have shown **reduced effort tolerance** (out of breath much quicker than they used to). Once thousands of tiny capillaries in the lungs are plugged up, the heart is pumping against much greater resistance to get blood through the lungs. This causes **pulmonary artery hypertension** from high blood pressure in lungs because so much blood can't get through/ so many vessels are blocked. People with pulmonary artery hypertension **usually die of right sided heart failure in 3 years.** For each successive shot, damage will be cumulative as more and more capillaries rupture due to clotting.

When previous mRNA vaccines were tested in animals, the animals seemed fine at first. But when they were exposed to the real viruses, their bodies over-reacted and they died.

People who die from covid and influenza viruses can have a **weakened immune system due to poor nutrition.** Continue over the page for details →

Trust The Scientists

How many times have you heard the phrase "Trust The Scientists" but never seen anyone's name mentioned? Below are several Doctors & Scientists that warn against the vaccines.

Dr. Robert Malone - Inventor of the mRNA Technology - In June 2021 made a 3 hour video in which he says in great detail why the COVID vaccine is so dangerous

Dr. Michael Yeadon - Worked for Pfizer for 16+ years reaching the position of Vice President says these vaccines are dangerous

Dr. Geert Vanden Bossche - Worked in the vaccine industry his entire career says injecting millions of people during an ongoing pandemic is dangerous

Dr. Charles Hoffe - Canadian physician: Majority of vaccine recipients are showing blood clots: See video: tinyurl.com/8k7e9fpt

Professor Dolores Cahill - from University College Dublin School of Medicine - Expects those that get injected to start dying or getting very sick within the next few years.

More Doctors that have spoken up about the dangers of the vaccines you can look up
Dr. Roger Hodkinson, Dr. Byram Bridle, Dr. Peter McCullough, Dr. Zev Zelenko, Dr. Carrie Madej, Dr. Sherri Tenpenny, Dr. Stephanie Seneff, Dr. Lee Merritt, Dr. Vernon Coleman, Professor Sucharit Bhakdi.

FOR THE COMPLETE AND DETAILED TRUTH ABOUT COVID-19 SEE COVID-TRAIL.COM

Continued.... People that have supposedly died 'of' and not 'with' covid (generally the frail / elderly) - died because their bodies over reacted to the virus (this is called the cytokine storm) just as they would die from a flu. Taking Vitamin D regularly (at least 4000iu per day) will help prevent this over reaction. To understand how people are being falsely labeled with covid, the test being used (giving almost entirely false positives), and for the video of the PCR test inventor clearly stating the test 'does not tell you that you're sick', see section 5 – COVID-TRAIL.COM.

Flu season always occurs in winter when people cannot make enough Vitamin D from the sun. Taking Vitamin D is the easiest way to help reduce sickness from Flu/ COVID. A healthy immune system will easily fight off these viruses. See the brilliant interview with Australian Professor- Ian Brighthope on this here: tinyurl.com/j23nrcuf or for a full vitamin protocol for both prevention (Video point 7.40) and treatment see: tinyurl.com/beu3zre6

Taking Vitamin D will also help reduce joint and back pain in as little as 2 weeks (take at least 4,000iu per day), as well as reduce your chances of getting Cancer, Heart Disease, Diabetes, Multiple Sclerosis and many other medical conditions. If more people took Vitamin D the medical companies would lose billions in lost revenue. Even cheap generic drugs (such as Ivermectin which, in a combination has seen massive success reversing sickness in COVID patients) are now being heavily suppressed to make way for vaccine profits.

See COVID-TRAIL.COM for complete list of alternative simple nutritional and drug treatments

Please note, information from doctors speaking out about the vaccines is heavily suppressed by all big tech companies like Youtube, Google, Twitter and Facebook. Alternative websites are:

- [Bitchute.com](https://bitchute.com)
- [Rumble.com](https://rumble.com)
- [Odysee.com](https://odysee.com)

* Note that every expert in opposition to the dangerous experimental vaccines is attacked online, with tactics as extreme as rewriting/ falsifying their wikipedia profiles.

URGENT UPDATE PART A – Serious adverse affects in 12-17 year olds after vaccine - CDC report included:

- Video reference point 13m 20sec > tinyurl.com/323n4kmy (Note video also covers report on SarsCov2 virus never being isolated/ identified.)
- Of these serious adverse events, over 40% had myocarditis (heart inflammation causing permanent heart muscle damage)
- CDC (Center for disease control- USA) PDF report (see page 3) > tinyurl.com/ypbh9ak9
- Despite terrible outcome, CDC has put forward request for Emergency Use Authorisation EUA to be expanded to 2-10 year olds.
- CDC so far (Dec 14, 2020 to July 16, 2021) reports 863 serious adverse events out of around 75000 12-17 year olds including 14 deaths

URGENT UPDATE PART B – Further serious danger of Spike protein discovered by Dr. Bryam Bridle

- Dr Byam Bridle Interview. > tinyurl.com/4svfzmzv
- Spike protein after travelling though the blood, also causes neurological damage after crossing blood brain barrier (causing bleeding/ clots in the brain)
- After injection, vaccine and Spike protein circulates all through the blood.
- Spike protein accumulates in spleen, bone marrow, liver, adrenal glands and in particular ovaries- in high concentration
- Spike protein has been found to be a toxin/ pathogenic protein
- Vaccine and spike proteins transfer through breast milk to infants causing bleeding disorders in the gastro intestinal tract
- Causes cardio vascular system damage, bleeding clotting
- Transfusion implications are also apparent
