

TOXIC FLUORIDE DOES NOT BELONG IN OUR WATER!

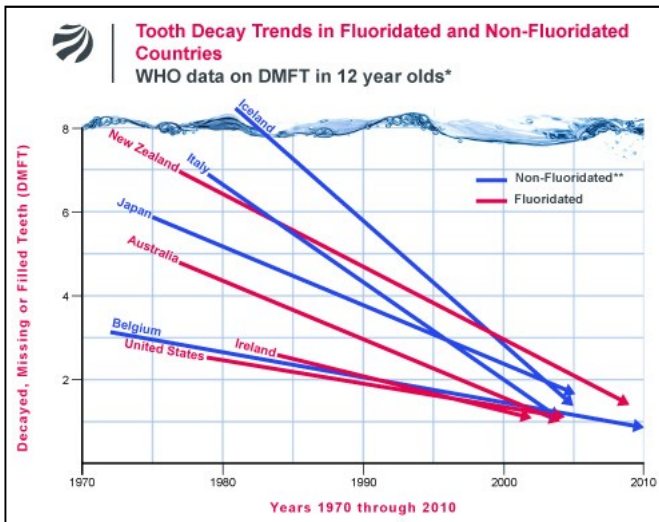

“Fluoridation is the greatest case of scientific fraud of this century, if not of all time” - Dr. Robert Carton PhD, former US EPA scientist

Gold Coast residents, there’s something **TOXIC** in our drinking water!

Fluoridation chemicals added to our drinking water are...

NOT SAFE: Thousands of studies have reported adverse effects on many parts of the body. Fluoride damages the brain, kidneys, bones, thyroid and pituitary glands.

“There’s no doubt that the intake of fluoridated water is going to interrupt basic functions of nerve cells in the brain, and this is certainly not going to benefit anybody.” — Dr. Robert Isaacson, 2006 National Research Council Scientist

NOT EFFECTIVE: There is no difference in decay rates between fluoridated and non-fluoridated countries, cities, regions. Australia has a dental decay epidemic, yet around 90% of its population receives fluoridated water. The science used to promote fluoridation is extremely weak and many misleading tactics are used in Australia to defend and promote fluoridation.

NOT ETHICAL: Fluoridation violates medical protocol; there is no informed consent, no warning of possible health risks, no prescription or regard for an individual’s circumstances and no control of dose.

“Fluoride goes against all principles of modern pharmacology. It’s really obsolete. I think those nations that are using it should feel ashamed of themselves. It’s against science.” - Dr. Arvid Carlsson; Nobel Prize for Medicine 2000.

A TOXIC WASTE: Fluoridation chemicals are a Schedule 6/7 Poison; a very hazardous, highly-toxic bi-product from the processing of phosphate fertilizer.

“Fluoridation is unsafe, ineffective and unethical” - Mark Diesendorf, PhD, Associate Professor, UNSW Sydney.

Gold Coast and all Queensland residents:
FLUORIDE does not belong in our water!
