

In **September 1991** shortly after the end of the cold war a cabal of elite bankers and intelligence spooks **led by George H W Bush** financed a **240 billion dollar covert operation war chest** through the purchase of tenure securities, that, as it happened, were scheduled to come due on **September 12th 2001**. **Project Hammer** was undoubtedly used for a wide variety of illicit intelligence operations but mainly it was used to finance a **covert economic operation against the collapsing Soviet Union**, whereby unknown western investors bought up much of the soviet industry when **they focus on oil and gas crashing the Russian economy, looting it's central bank, orchestrating what became known as the great roubles scam and a wide variety of clandestine state assisted operations designed to thoroughly prevent Russia from ever contesting the US as a world superpower**. While the process **lining the pockets of these economic hit men who swooped in to devour the collapsing Russian economy** after the fall of the Soviet Union.

A spectacular investment for all at least until money-laundering investigation speed and tracing all the money or when a ten year deadline came up in the securities became due and began the routine process of authenticity and ownership checks. Evidence shows that several federal and private investigations had already stumbled upon the Hammer Fund and were compiling evidence on up until the 911 attacks these included the **Office of Naval Intelligence or ONI** which was moved to the Albert Building that the recently credit section of the **Pentagon that was targeted and destroyed on 911**.

According to E P Heidner, the **ONI had been investigating crimes associated with the plundering of Russia**.

Thirty nine of the forty people who worked in those offices were killed on 9/11 including the entire chain of command. The Pentagon's financial accounting offices in that same way were also an obvious target as were the passengers on board Flight 77 many of whom coincidentally held top secret clearances [As seen in 'Operation Terror' that's the plane that landed at Hopkins Airport, Cleveland, where 200 passengers were taken in buses to a disused NASA building and have never been seen since, just disappeared!] and **were connected with Pentagon black operations**. Agents of the office of naval intelligence had also been investigating financial transactions which were linked to securities being managed by those securities dealers in the World Trade Centre [WTC] that were also a targeted.

Thirty one percent of the 125 fatalities in the Pentagon were from the Naval Command Centre that housed the Office of Naval Intelligence. Forty one percent of the fatalities in the twin towers came from two companies that managed US government securities, **Cantor Fitzgerald and Euro Brokers**. There were three major security brokers in the WTC, Cantor Fitzgerald, Euro Brokers and Garban Intercapitol.

At 8.46 in the morning of September 11th **Flight 11 [a flight not scheduled that day and the acknowledged plane was still flying 2 years after 911]** flew directly into Marshall McLennan secure computer room in the north tower right below the floor where Cantor Fitzgerald were situated. Cantor Fitzgerald was the largest security dealer in the US.

Shortly after that a massive explosion went off just under the FBI offices in the North tower on the 23rd floor.

Fires were reported on the 22nd floor at 8.47, there were also explosions and subsequent fires reported at Garban Intercapitol on the 25th floor and in the basement of Tower One as well. Shortly thereafter at 9.03 **Flight 175 [also didn't fly that day and plane was still registered 2 years later]** hit the South tower right below the floors on which Euro Brokers were situated. In all three cases the explosive fiery destruction consumed the offices in these several floors above destroying files and trapping victims inside.

In the midst of all this **Building 6 was destroyed by an explosion that took place before either tower fell**, this secondary explosion took out a portion of the building which just happened to include the **Eldorado Task Forces Offices**. The Eldorado task force was an **interagency money-laundering watchdog group responsible for co-ordinating all major money laundering investigations in the US**. In the immediate aftermath of September 11th these groups would be redirected to investigate terrorist financing. Building 6 was located directly between the North Tower in WTC and Building 7. All large portions of WTC 6 were gutted by explosions and later by falling debris from the north tower. The building itself did not suffer a global symmetric collapse at near free fall acceleration as did Buildings 1,2 and 7.

Fema photographer and 9/11 whistle blower Kurt Sonningfield took some interesting pictures of the US customs vault in the basement of WTC 6 which was

found completely empty and left with the door wide open, all of its contents appear to have been looted during the attacks.

There's also evidence that gold was being looted from the vaults beneath World Trade Centre Four. There were several early reports of a 12 wheel **truck packed with stolen bullion caught fleeing WTC 5**; when the vehicle had become stuck on a collapsed ceiling brace forcing the driver to flee the scene.

Many researchers have stumbled across one or two of these anomalies from time to time. The empty vaults, the secondary explosions the fire proofing upgrades on the **exact floors coinciding with the failure of impact** in the towers the suspicious **power downs, evacuation drills.** the WTC tenants and security firms like **AIG, Marsh and McLennan and Kroll** and their close ties with the intelligence community etc. etc. These anomalies are not unrelated but nevertheless became lost inside the chaos at that September morning, the aftermath and subsequent cover-ups.

Okay so what does all this mean?

Overall a critical mass of brokers from the major **Government Security Brokerages** in the twin towers **had to be eliminated to create chaos in the Government securities market. A situation needed to be created where 240 billion dollars of covert securities could be electronically cleared without anyone asking questions.** Which happened when the Federal Reserve declared an emergency and invoked its emergency powers that very afternoon.

On September 14th the Securities and Exchange Commission declared a national emergency and for the first time in US history, it invoked its emergency powers under the securities exchange act Section 12 K and eased regulatory restrictions for clearing and settlement security trades for the next fifteen days. **These changes would have allowed the estimated 240 billion in covert government securities to be cleared upon maturity without the standard regulatory controls around identification of ownership.** The towers needed to be demolished to create a big enough mess that the illicit activities taking place behind the scenes that morning could be hidden in the confusion of that day.

Okay now let's talk a little bit about who did it and how?

911 whistle blower Richard Andrew Grove was a software sales person for a company called SilverStream. SilverStream's technology was on the cutting edge of internet solutions offering software well able to critical business functions of fortune

five hundred companies basically integrating in making available on the web, the disparate legacy applications in mainframes simultaneously streamlining workflow in traditional paper processes with an end result being at lower cost of operation in more efficient transactions.

SilverStream had built internet transactional and trading platforms for Merrill Lynch, Deutsche Bank, Banker's Trust, Alex Brown and Morgan Stanley to name a few. Leading up to a 911, Silverstream was a designed specialised accounting software for eight major clients. Marsh & McLennan is the world's largest insurance brokerage and was located at right below Cantor Fitzgerald north tower, approximately 295 Marsh employees were murdered that morning along with other innocent victims and employees who do too much or too little about their chosen work environment but most importantly SilverStream provided a specific type of connectivity that was used to link AIG and Marsh & McLennon's first two commercial companies on the planet to employ this type of transaction.

What then were Marsh and AIG doing and why did they need to leverage technologies that no other commercial entity on the face of the earth need to use to conduct business.

The recovered hard drives from the WTC combined with Richard Grove's testimony give us some intriguing clues Grove discovered that SilverStream was over billing Marsh to the tune of 7 million extra dollars for a fictitious and unneeded hardware, he also became aware of an exploitable flaw in the accounting software that had been sold to a variety of Marsh's clients and partners. When he brought this up to his superiors at SilverStream and others at Marsh. **He was told to keep quiet and not worry about it, but other friends of his at Marsh were also getting concerned and began documenting what was going on,** in raising concerns within the company. At last **they were finally granted a hearing with one of Marsh's high-ranking executives and were told to bring all their evidence to a hearing scheduled for 8.30 am on September 11th 2001, on the 93rd floor. The high-ranking member of Marsh and Grove did not name who would participate via teleconference from the safety of his home all Marsh's employees and potential whistle blowers Gary Lasgow, Katherine Lee, Ken Rice, Richard Brueheart and John Alltopper were in the meeting room in the New York north tower with all their evidence, when American Airlines Flight 11 would impact that very section**

of the building. Richard Grove fortunately got stuck in traffic that morning and didn't make it.

Computer **hard drives** recovered from the WTC **show a spike in suspicious transfers that took place within the WTC as the 911 attacks were unfolding.** Richard Grove is convinced that the suspicious money transfers were performed electronically using SilverStream software and that the over billing of Marsh was hush money for the operations; it would certainly have **helped clear up that 240 billion** in securities and make it look like any of those companies might have done it.

The recovered hard drives and financial transactions from 911 all show clear evidence that something was going on that morning. Marsh's CEO at the time was Jeffrey Greenberg the son of Maurice Greenberg of AIG.

Most insurance companies were hurting badly in late 2001 after 40 billion dollars in insurance settlements had been paid out for the devastation caused by the 911 attacks, yet one insurance company did not suffer quite the same losses as the other companies did. American International Group or AIG as it turns out is much more than an insurance company with its long ties to the intelligence community energy.

AIG was founded by OSS operative Cornelius B Starr [two r's] the uncle of Clinton's friend Kenneth Starr. AIG currently operates a complex network of Shelf companies and other entities which operate internationally and which have been **used for clandestine intelligence gathering and other covert activities for decades.**

The company that ran security in the WTC, Kroll Associates was owned by AIG, the CEO of AIG on 911 was a guy named Morris Greenberg who was actually nominated for the position of Director of Central Intelligence after he authored a report for the council on foreign relations of which is a high ranking member where he advocated that, "FBI in Drug Enforcement Agency agents operating abroad should not be allowed to act independently of either the Ambassador or the CIA lest pursuit evidence or individuals for prosecution caused major foreign policy problems or complicate ongoing intelligence in diplomatic activities."

Of course this type of policy is essentially a continuation of things like executive order 12333 in the **CIA assisted contra cocaine trafficking** that went on as an immediate result. These backdoor agreements open the floodgates for government drug money laundering and narco trafficking. former LAPD narcotics detective turned whistle

blower Michael Ruppert has written a series of excellent articles documenting **AIG's involvement in drug money laundering**, undoubtedly revealing yet another **motive for the invasion of Afghanistan, a country which currently produces over 90% of the worlds heroin supply**. Drugs are arguably the most profitable commodity on the entire international market and drug money was undoubtedly a motive behind the invasion of Afghanistan and consequently the 911 attacks. Well companies like AIG launder the drug money for the big banks; the actual drug production in trafficking can be traced back to **the same Iran-contra affiliates like Richard Armitage and Frank Carlucci**. Unfortunately that rabbit hole is a bit too deep and off-topic to get into here. I will mention **DynCorp heavily involved as well as Stuart Airforce Base** in upstate New York where the **two flights out of Boston cross out simultaneously and shut off their transponders** before making their way to the twin towers.

Many researchers believe that the media operation was moved to Stewart Airforce Base after Barry Steele got whacked.

Richard Armitage was the deputy Secretary of State on 911 and according to Michael Springman that he was the **man responsible for granting visas to fifteen out of nineteen of the 911 hijackers allowing them to enter the US and pursue flight training**.

Frank Carlucci is the chairman of the Carlyle Group and was in Washington DC on 911 having just met with George H W Bush and the brother of Osama bin Laden on Carlyle Group business. Frank Carlucci was also the **chairman of BDM International, A company that served as a front for state department black operations**. Frank Carlucci's employee's at the international left to take charge of **Stratasec the WTC** an airport security firm corporate operating officer Barry W McDaniel and ex-military expert in logistics and materials distribution and **CEO Dexter Walker the third was a distant Bush cousin from Herbert Walker line with an extensive history of managing CIA front companies**. **Marvin Bush the president's brother was also a board member Stratasec**, although Stratesec maintained contracts for security upgrades which were **set to expire on September 11th 2001**. They were not the company officially charged with WYC security this role was assigned to a risk management firm called Kroll Associates. Kroll's chairman **Jerome Hower** it was a **long-time personal friend of ex-FBI counter-terrorism**

expert John O'Neil and was responsible for O'neil's appointment as head of security for the WTC just a few days prior to the 911 attacks. O'neill was the world's leading expert on Osama bin Laden and al-Qaeda and was a potential 9/11 whistle blower with hard evidence of White House complicity in the protection and shielding of the 911 hijackers from all means a federal investigation. Al-Qaeda hijacking suspects were flagged by the **Able Danger** terrorist tracking program which was also shut down by the White House. Able Danger whistle blower Anthony Schaeffer claims the US government destroyed over sixty terabytes of data related to danger which he also claims identified 911 ringleader Mohammed Attar as early as February 2000.

Those atop the chain of command in the White House military and intelligence establishment deliberately ignored all the warning signs of an impending attack. A clever strategy of plausible deniability which also served to betray those in charge as incompetent rather than complicit. In every major head through the chain of command on 911 from Norad to the military we see a repeated theme of complicity through negligence or incompetence. After the 911, failure and incompetence was rewarded and whistle-blowers were silenced; combined with the fact that **six corporations control ninety percent of the media and CIA operations like Mockingbird admit to taking over and subverting our US media we can understand how such a big lie could have been kept from the American public for so long**; but if you stop and take the time to do your research you'll find all the evidence is there hidden beneath a mountain of disinformation and lies.

It's been ten years since 911 happened and we are left with hundreds, if not thousands of unanswered questions about the 911 attacks. **A transparently fraudulent 911 commission report which purposely failed to even mention the collapse of WTC 7** and a host of ridiculous and so-called debunking websites forms and other literature which have done absolutely nothing over the past ten years to debunk anything other than cleverly selected straw men arguments and have failed to stem the constant flow of new 911 information, which researchers have been uncovering and bringing out to the public. Instead they continue to **label truth seekers including family members of people who died on 911 as conspiracy theorists and devise clever propaganda designed to prevent the general public**

from looking any further into the evidence or the actual claims of the so-called conspiracy theorists.

In this video [taken off the air] we'll take a deeper look into the so-called investigations which have provided us with the official story and why they deserve a more thorough examination.

The Bush administration stalled government investigations into 911 for over 400 days.

A week after 911 letters containing **Anthrax** spores were mailed to several news media officers and **two senators who perhaps a bit too vocal about opening an official investigation into 911**. The anthrax used in the attacks was identified as ? strain which means it had to have come from the US army **medical research institute of infectious diseases at Fort Dietrich, Maryland**. [Think origin of Covid 19]

A member of that institute Jerome Hauer managed the National Institute of Health response to the anthrax attacks coincidentally Hauer also warned the White House to start taking Cipro, an antibiotic which is effective against anthrax a week before the attacks!

Jerome Hauer also happened to be a managing director at Kroll Associates which ran security at the WTC up until the weekend before 911 when that role was personally handed off by Hauer to FBI agent John O'Neill who would later die in the attacks tying strong suspicion that he was set up due to his knowledge of al-Qaeda and the 911 hijackers whom he was blocked from investigating while he was working at the FBI.

In January 2002 President Bush personally asked Senate majority leader Tom Daschle to limit the congressional investigation into the events of September 11th The Bush administration only formed the 911 commission after being prodded by the victim's families who lobbied congress for over a year to open the investigations.

When the Bush administration finally did open a 911 investigation it was described by some members as **set up to fail**. "The president had said **only a minority of the commission can see a minority of the documents and then they have to clear what they are going to say to the rest of the commission with the White House.**" "If you are one of those four that that's the see these documents would that

change your opinion?” “No, they don’t want any more eyeballs to see their documents but then they could possibly get away with.

It's a scam, it's absolutely disgusting. They even attempted to appoint **Henry Kissinger, a known cover-up mastermind as head commissioner**. He resigned after victims family members asked him sensitive questions about his connections to the Bin Laden family and the Carlyle Group.

Philip Zelikow wrote the conclusions for the report before the investigation ever began and even then, any areas which did not support the official story were neither mentioned nor investigated by the 911 commission. Six out of ten members of that commission have discussed, on record, how the government lied about the official story and **70% of the questions posed by the victims' families where never answered or officially investigated**.

It's important to look at what happened to the evidence from 911 **the day of 911 most of the FBI was in Monterey California on an agency retreat**.

“Let’s go down to our state department.... correspondent Andrea Mitchell: “Andrea can you tell us is going on?”...“well this from the FBI. The State Department has been evacuated, there was a meeting going on at the operations centre, other top officials were in the situation room at the White House. Colin Powell is in Bogota, Columbia on a 2 day trip. But this very interesting information Katy, Matt and Tom, from the FBI. They have been operating, a massive exercise from their hostage rescue unit. All of their top teams, about fifty personnel, helicopters, equipment, were in Monterey California for the last two days scheduled to fly back today commercially. So all of those people are out of place, it’s fair to say. According to sources that we’ve talked to here at the NBC that the FBI uh... rescue operations and other FBI operations are really in chaos right now, because they can’t reach their officials in New York, all of their phone lines are down and now you’ve got all of their specialist experts on this, stuck in Monterey California trying to get a military flight back because there are no longer commercial flights. So they are seriously out of pocket and there is a real danger of breakdown of the FBI anti-terrorist co-ordination team which is of course the principal team that would lead any effort, and was so effective under Jim Carston in New York City during the WTC bomber, bombing and the CWA explosion that turned out not to be a terror. “ Andrea is the state department?.....

This was **essential for keeping the more experienced and honest members of the agency as far away from the crime scene as possible while other agency insiders could be assigned to the investigations** before their counterparts returned.

Turner Construction, one of the primary contractors at Ground Zero occupied the 30th floor of the North Tower and was involved in performing the fire proofing upgrades inside the towers. It has been noted that these upgrades were completed in the three years before 911 on **floors that match up almost identically into the floors of impact and failure on 911.**

Once the clean-up was fully co-ordinated the operations were consolidated under the control of **two primary contractors, Amec Construction Management and Bovis Lend Lease.** These are the two companies that were originally assigned to the areas of ground zero that included the North tower, Amec, and the South tower, Bovis. A truly surprising fact is that at the time of the attacks on 911, **Amec had just completed a 258 million dollar refurbishment of Wedge One of the Pentagon which is exactly where American Airlines Flight 77 impacted that building. Arguments over the size of the hole of the Pentagon** and whether it was a plane or a missile are in my opinion a convenient distraction from the much bigger picture of why that section of the building was targeted and by whom?

On September 10th 2001, Secretary of Defense **Donald Rumsfeld announced that 2.3 trillion dollars in unadjusted funds were missing from the Pentagon budget.** The very next day the officers whose responsibility it was for tracking that money down were destroyed when **American Airlines Flight 77 impacted that very section of the building, the only off-site backup for the Pentagon's black budget financial records** was a secure Federal office building in the WTC complex. Strangely it too was destroyed on 911.

WTC 7 was the largest CIA headquarters outside of Langley Virginia and housed offices involved in several large-scale federal investigations, into massive stock market and accounting fraud. Not surprisingly **WTC 7 was the first to be cleaned up and the evidence destroyed at ground zero. "So if the twin towers and Building 7 were brought down in a controlled demolition and the scientific evidence points to Nanothermite. Then who could have produced this and who could have put it in the buildings and how did they get it there?**

In the impact zone of the North Tower was a company called Marsh & McLennan, which at the time was the world's largest insurance brokerage company. **One of Marsh's executives was a guy named, L Paul Bremer** who was also the chairman of the congressional national commission on terrorism for 1999 to 2000, and the US ambassador at large for counterterrorism from 1986 to 1989. Instead of going to work on the day of 911 and dying inside the towers with hundreds of his employees **Bremer decided to go on MSNBC and tell the world that Osama bin Laden was behind the attacks and possibly Iraq and Iran and then he demanded "the most severe military response we can up with"**.

L Paul Bremer was called away from Marsh in 2003 to become the Iraq occupation governor, a role he has been widely criticised for. So Bremer not only worked inside the buildings but had offices directly in the impact zone on the South Tower where Flight 175 would hit. He missed work on the 911 to give us the official story on national television and went on to be the Iraq occupation governor. You really can't get more connected to 911 than that. Oh wait you can, sorry, I forgot to mention that **Bremer was also the former manager for Kissinger Associates**, he was a member of the board for Accel Nobel the parent of international pain company which produced a fire proofing application for skyscrapers, called Interchar. **Bremer was also on the international advisory board for the Japanese mining and machinery company Komatsu**, which at the time had been involved in a joint venture agreement with Dresser Industries the oil services intelligence front where Prescott Bush senior and George H W Bush got their start Neil Mallin anyway the Kumatsu **Dresser mining division operated from 1988 to 1997, and in July 1996 had patented a Nanothermite demolition device that could, quote, demolish a concrete structure at high efficiency while preventing a secondary problem due to noise, flying chips and dust and the like as many of you know residues of thermite, a highly energetic chemical mixture have been confirmed in samples of WTC dust and the use of thermite at the WTC** was also revealed by environmental data, see the description for more like some sort of.

Scientific applications international corporation a defence contractor with expertise in Thermite related technologies played a large part in the midst of the WTC investigation.

A few other names of companies inside the Twin Towers also worthy of also worthy of further investigation include **Craig Stapleton who is married to Bushes cousin Dorothy Walker Bush**. Stapleton was the **president of Marsh Real Estate Advisors from 1982 to 2001**. He was a member of the board of directors for Cendant that was charged with massive accounting fraud in 1998 and went on to join Winston partners, a privately owned investment firm founded in 1993 and led by George W Bush's brother Marvin. Other very powerful and well-connected people worked in senior management at Marsh, these included **Stephen Friedman a senior principal at Marsh Capital** and former partner at Goldman Sachs who later became George W Bush's top economic advisor. **Friedman** was also a member of the Brookings Institution, the **Bilderburg Group**, the foreign intelligence advisory board and the board of In-Q-tel the investment firm founded by the CIA in 1998. In-Q-tel invests in state of the art technologies related to defence and intelligence work including nano and chemical technologies, according to its website. In another interesting coincidence **Friedman belonged through Cornell University to a secret society called Quill and Daggar, the membership of which includes Paul Wolfowitz, Sandy Berger and Steven Hadley**.

Wolfowitz the neocon deputy secretary of defence in the Bush administration was the author in **1992 of the Wolfowitz Doctrine of Pre-emptive Warfare**. He also made comments about a surprise like **Pearl Harbour months before 911** and met with Pakistani ISI general Mahmoud Ahmed in the week before 911. **Berger** the national security advisor to President Clinton was later **caught stealing documents from the 911 commission investigation**. Berger was also the boss of White House counter-terrorisms **Richard Clarke** and together with **Hadley who was Condolizza Rice's deputy was responsible for delaying or obstructing Clarke's plans to stop al-Qaeda in January of 2001**.

Jeffrey Greenberg resigned from Marsh & McLennan after being accused of serious financial crimes the first plane of 911 flew directly into his company's secure computer room in the North tower. **Jeffrey Greenberg is a member of the Brookings Institution and the trilateral commission**. Jeffrey Greenberg rose quickly through management at Marsh having come there directly from AIG in 1995 and then becoming CEO just four years later. **At Brookings, Greenberg hobnobbed with Lee Hamilton co-chair of the 911 commission**.

There's also **Jim Pierce** another Bush cousin who is managing director of AON corporation who according to the NIST report, modified unknown sections of floor 83 in the South tower in 1997. **Jim Pierce had arranged a meeting on the 105th floor of the South tower for that morning.** Pierce survived that day despite the fact that twelve people came to the meeting in the South tower and eleven of them died. **The location of the meeting had been changed the night before to the Millennium Hotel where Pierce watched the South tower as it was hit by the aircraft, apparently the meeting attendees were not all notified of the change in location.**

Another interesting character is **Joseph Caspudes of Baseline Financial Service** which occupied the impact zone at the South tower on floor 77 and 78 where United Airlines 175 impacted. Caspudes has a history of being well connected to the highest levels of government as well as to the defence and intelligence industries. **Caspudes worked from 1972 to 1977 for the US Department of Commerce and Defence. He was also the deputy director of Nixon's White House task force that dealt with the Arab oil embargo of 1973** and was instrumental in the creation of the department of energy. **Caspudes went on to run a large corporation called Primearc** that had offices in both towers on 911. **One of the subsidiaries of PrimeArc The Analytical Sciences Corporation, TASC worked with so-called black or top-secret programs, TASC also worked closely with the national institute of standards and technology [NIST].** Caspudes was also a member of the logistics management institute LMI, whose members included **Paul Kaminski of In-Q-tel and General Dynamics, Charles de Bono of Halliburton, Skull and Bones member Joseph Samuel Nye and Michael Daniels of Scientific Applications International Corporation.** LMI's self-proclaimed role is advancing the science of government. **Caspudes connections to the DOE from 1977 through to at least 1997 are interesting considering that the DOE was developing Thermite ignition devices as early as 1983.**

Joseph Caspudes went on to become the CEO of Baseline Financial Services which was directly in the impact zone on the 78th floor of the South tower according to NIST **Caspudes Baseline Financial modified the south east corner of floor 78 in 1999 exactly where the aircraft hit on 911. Floor 77 and 78 were upgraded for fire proofing in June, and April of 1998 respectively.**

Another company of interest on floor 91 just above the impact zone for the South tower was **Washington Group International**. This company was known primarily as a construction and mining firm and it had **just acquired Raytheon Engineers [they make drones] in July of 2000**.

In **1996 Washington took over Morrison Knudsen**, an engineering and construction firm that had a history of working on large-scale projects around the world, including in **China, Iran, Afghanistan and Saudi Arabia**. The army corps of engineers hired Morrison Knudsen to **demolish over two hundred buildings in 1995**. One of the DOE facilities for which Washington was responsible well before 911 was the Savannah river site near Arken South Carolina in February of 1997, Lawrence Livermore National Labs in the Savannah river site signed an agreement on co operation to share technology. Savannah went on to add **developing Sol Gel technology** for fuels and other applications to its portfolio. **Sol Gel technology is utilised by Lawrence Livermore National Laboratories for making Nanothermites**. In another coincidence Savannah River Technology staff participated in the search and rescue operations at ground zero by providing unique tools.

Just before 911 Washington was going through a tough time financially and sought Chapter 11 bankruptcy protection. Securities and Exchange Commission documents show that **Washington made court ordered pre-petition payments as part of these proceedings to a number of companies including Komatsu**. Washington also made **payments to Greenhorn and O'mara**, whose employee **Teresa McAllister was a lead author of the Fema and NIST reports** on the WTC disaster and to Sumitomo Bank which was closely allied with Komatsu.

Building 7 was a 47 story Federal Office Building in the WTC centre site which collapsed at 5.20 pm on the afternoon of 911. This building was **home to the CIA**, in fact the largest CIA headquarters outside of Langley Virginia; it **also housed offices for the Secret Service and the Securities and Exchange Commission**.

One of the most interesting tenants however, was then **Mayor Giuliani's Office of Emergency Management** and its emergency command centre on the 23rd floor. This floor received 15 million dollars worth of renovations including independent and secure air and water supplies and bullet and bomb resistant windows designed to withstand two hundred mile per hour winds.

Mayor **Guiliani was a former US prosecutor** for the south district of New York from 1983 to 1989, who was in charge of investigating the terrorist financing bank of credit and commerce international. After he left his job as a prosecutor to start a political career he worked for a law firm called **White & Case that actually represented BCCI. So he went from prosecuting the BCCI to working for a law firm which defended the BCCI.** This was likely his foot in the door of this underground corporate criminal network.

Guiliani would later help to destroy all the crime scene evidence from ground zero. Guiliani's sidekick on 911 was police commissioner **Bernard Carrick**, who appeared to be coaching some of Rubi's actions that day keeping him away from the media and even answering questions for him about explosives in the buildings. In fact **Bernard Carrick gave us the first official government pronouncement that no explosives were involved in the destruction of the WTC buildings. Carrick's department was also the same one that found that pristine, completely undamaged hijacker's passport which survived the plane impact and fireball which destroyed two titanium black boxes and three towers,** Yeh. Carrick would later receive a nomination from President Bush to become director of Homeland Security, which he declined for personal and political reasons and **instead took a job training the Iraqi Police Force in Iraq alongside L Paul Bremer. Both men are credited for turning Iraq into the unwinnable quagmire it is today.**

In February of 2010 Carrick was sentenced to four years in federal prison for conspiracy and fraud charges unrelated to the crimes of 911 unfortunately, but it still goes to show you what kind of person he is. **Definitely the kind of person you'd want inside the New York city police force during a staged event like 911.**

And lastly we have the Pentagon it certainly peculiar to say the least that al-Queda terrorists hell bent on destroying the USA would not crash their plane into the north wing of the Pentagon where all the most important officers were, like Donald Rumsfeld, John Ashcroft etc. and that they would **instead choose to target the one section of the Pentagon that had most recently been re-furbished to withstand missile impacts. It's also interesting to note that the company which completed the two 258 million dollar refurbishment to which one, the Pentagon was also hired as a contractor to clean up ground zero in New York city.**

Wedge One also coincidentally housed the **Pentagon's budget analyst office** where **DOD staffers** were working on the mystery of the **2.3 trillion dollars** that was reported missing by **Defence Secretary Donald Rumsfeld** in a press conference the day before **911**. The Pentagon's comptroller in charge of that money at the time was an interesting fellow names **Dov Zackheim** a member of the council on foreign relations, the international institute for strategic studies and the contributors in the neocon think tank project for the **New American Century**. **Zackheim** helped write the **Peenack document** rebuilding America's defences which **he is credited for the line** which states further the process of transformation even if it **brings revolutionary changes likely to be a long one** absence some catastrophic in catalysing event like a new Pearl Harbour. Several members of the **Bush administration** including **President Bush** himself would later refer to **911** as a new Pearl Harbour.

A respected and established voice in the intelligence community, his views were eagerly accepted and **Dov went from his position at Systems Planning Corporation to become the comptroller of the Pentagon in May of 2001**. Perhaps not so coincidentally it was SPC subsidiary tri data corporation that oversaw the investigation after the terrorist attacks in the WTC in 1993.

SPC according to their official website specialises in many areas of defence technology production and manufacture, including a system developed by their radar physics group called the **Flight Termination System or FTS**. **This is a system used to destroy target drones, craft that would be fired on by test aircraft or weaponry**. In the events of malfunctions or misses this highly sophisticated war game technology allows the control of several drones from a remote location, on varying frequencies and has a range of several hundred miles. **This technology can be used on many different types of aircraft including large passenger jets**. According to the SPC website a recent customer at that time was Eglin Airforce Base located in Florida. Eglin is very near another air force base in Florida, McDill Airforce Base, **where Dov Zackheim contracted to send at least 32 Boeing 767 aircraft as part of the Boeing Pentagon tanker lease agreement**.

As the events of September 11th 2001 occurred, little was mentioned about these strange coincidences and the proximity of Dov Zackheim and his group since there was little physical evidence remaining after the events. **Investigators**

were only left with photographic and anecdotal evidence, this is a photograph of the flight termination system module from their site; note has a cylindrical shape and is consistent with the size and shape of the object observed under the fuselage of Flight 175. The Boeing lease deal involved the replacement of the ageing KC135 tanker fleet with these smaller more efficient that Boeing 767s that were to be leased by Dov Zackheim group. The planes were to be very refitted with for a few equipment including lines and nozzle assemblies in the summage in the flight 175 we can clearly see a cylindrical object and fuselage a structure that appears to be attached to the right underside of the rear fuselage section.

----- When seen in comparison is obvious that **the plane approaching the trade centre has both these structures** the FDA's marginal and then get here a few it quickly as configured on the market like Boeing 767 tankers. Of particular interest is the long tube like anomalous structure under the rear fuselage area of 175, this structure runs along the right rear bottom of the plane. The equipment attached to the underside of the **plane which hit the WTC is identical in every single way to the Boeing 767's issued by Dov Zackheim.** "Oh oh oh bring it back," The video you are watching now came from Loose Changes first edition, "did you catch that?" It appears to show the **FTS pod self-destructing just before impact also notice the flash is reflected fuselage** is also the flash is also present Edward Fairbanks, Jennifer Spell, CNN. Al-queda certainly couldn't have this type of equipment, and even if they did the flight crew would have noticed it, so where this plane come from? **Another interesting piece of 911 evidence is the last 12 seconds of UA 175.** Since every amateur videographer in New York city had their cameras pointed up that the burning tower one the second plane strike was filmed from nearly every conceivable angle.

Expert analysis of this plane leads to some startling revelations, first, there's the expertly controlled flight characteristics of this plane. During its last twelve seconds of flight **UA 175 made a single corrective manouvre, so perfectly timed and executed, that it was unlikely it was piloted by human hands.** "One of the things that jumped out at me when I look at the uh...the footage of the video of flight 175 as it went into the world trade centre is, it appeared to me that there was something strange on the under the fuselage of the aircraft that did not belong there, at least not

with the commercial airliner, now I tell you where I have seen attachments that, that looked like that, on military aircraft.” So the question you have to answer now, is was that the commercial airliner that have been WTC or possibly was it an aircraft that was very **similar, but was a military type airplane”**.

All the recorded forces all the different photographic evidence, that was produced by CNN and ABC they all show this pod, it’s there, you can see it with your own eyes and in my professional opinion uh... that there was a pod attached to that the bottom of that aircraft and **the flight was not United Airlines flight**. If you take a careful look at the flight paths for American Airlines leavening you a 175 two flights that took off from Boston's Logan Airport and crashed into the twin towers. You'll find a major clue, not only did both these **planes crossed paths directly over Stewart Air Force Base but they did so at the exact same time**.

Another odd synchronicity is **Flight 93** which had been sitting on the tarmac delayed at the airport for nearly forty minutes with no explanation.

Originally scheduled to take off at 8.01 am, **it was delayed until the moment that flight AA11 crashed into the North tower at 8.43 am**. Another interesting piece of **evidence that ties Stewart Airforce Base to the centre to this 911 conspiracy is the white mystery plane spotted over Washington and the Pentagon**. Through careful investigation we've been able to map out the flight paths **these two ominous aircraft which have been identified as E4B's, a type of aircraft that the military use as vocal command posts**; what concerns me is that both of these aircraft took off from and landed at Stewart Airforce Base. **Another interesting coincidence I found was that Flight 93 turned around directly over Hopkins Airport and Flight 77 turned around directly over Tristate airport**.

Webster Tarplee has done some of the most thorough research into the war game exercises they were taking place on the day of 911. But this point mystery plane, the doomsday plane what was it doing over the Pentagon and the White House on 911? **Who was flying that plane?** What were they doing?

Being the comptroller for the Pentagon and the chief financial officer you have to kind of wonder **what Dov Zackheim was doing on 911, and what his connections were to the 2.3 trillion dollars that were missing from the Pentagon the day before 911**.

“If anything the individuals and organisations outlined in this video are at least as suspicious as the nineteen hijackers themselves”

“I have nothing on it” “book him Danno” ?

*NB:— Please note there still could be a few mistakes in the voice recognition transcript-
- The report about the FBI on recreation was made by telephone.*
